Dear Sir

I wish to express our gratitude to you Sir, for the work done to our school. When we look back and see the level of technological development, it seems as if something mysterious has happened, but not, it is because of your assistance. You even use your family valuable time to assist us with our computers, what I have observed from you is:

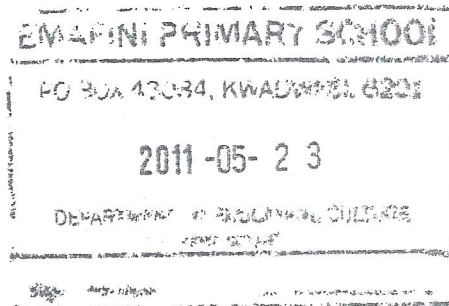

- You have passion to your work
- You are well vest in your field of work
- Dedication to what you want to achieve
- Highly skilled to computers
- Prepared to go out of you way to help
- Problem solving is the core of your business
- Always look for alternatives when starked

We are very much fortunate to have met with you, so that our learners could be exposed to the technological world.

Thank you once more.

Yours in education

M.E. JANUARY
